

Warm Up Rooms & Booths

Protect Your Workers & Improve Productivity

PORTAFAB
Modular Building Systems

Protect Your People

Studies show that constant, long-term exposure to cold temperatures not only creates an unsafe and unpleasant environment for workers, but also slows the movement of workers and reduces their productivity.

Comply with OSHA Guidelines

Comply with one of OSHA's top tips for protecting workers in cold environments...

“Be sure workers in extreme conditions take a frequent short break in warm dry shelters to allow their bodies to warm up.”

– Source OSHA

By installing PortaFab Warm-Up Rooms and Booths and implementing OSHA recommended warm-up schedules, you can decrease the chance of workplace injury and help comply with OSHA guidelines.

Enhance Productivity

There is little debate that very cold temperatures limit productivity as one's blood flow is directed more to vital organs and less to one's extremities which tends to slow movement. By keeping your workers warm, you may have the added benefit of keeping them more productive.

Protect Your Workers and Your Company

Anyone working in a cold or damp environment for an extended period of time is at risk for cold stress. By installing PortaFab Warm-Up Booths and implementing OSHA recommended warm-up schedules, you can decrease the chance of workplace injury and help comply with OSHA guidelines.

Protection from the Cold

A variety of heating options can be added to regulate temperatures within the booth or room.

A Insulated Walls

Insulated wall panels can provide additional protection from extreme temperatures.

B HVAC Units

PortaFab booths can be outfitted with a number of standard HVAC units.

C Exhaust Fans

Integrated exhaust fans provide a cost-effective method of circulating airflow and improving comfort.

D Baseboard Heaters

Electric baseboard heaters can be surface mounted and integrated in the building's electrical system.

Standard or Custom Solutions

Whether you need a standard or custom-sized solution, PortaFab makes it easy.

Assess Your Facility and Compliance Needs
Identify areas where employees are exposed to excessive cold or dampness.

Select the Right Warm Up Structure

Multiple Options Available:

Modular Inplant Buildings

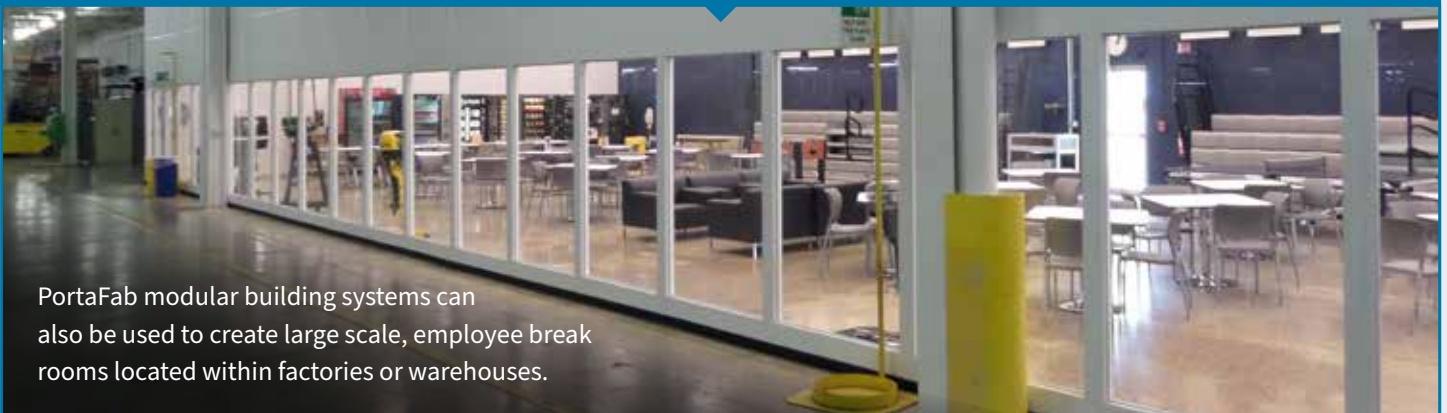

30 Standard Sizes - Our standard buildings come in 2, 3, and 4-wall configurations in sizes ranging from 8' x 8' to 20' x 40' and can be outfitted with modular electric packages to make installation a breeze.

Pre-Assembled Warm-Up Booths

19 Standard Sizes - Our all-welded, pre-assembled buildings are ideal for creating warm up booths for outdoor environments or when "instant portability" is desired. Ship fully assembled for fast installation.

Larger Scale Employee Break Rooms

PortaFab modular building systems can also be used to create large scale, employee break rooms located within factories or warehouses.

Create. Control. Partition. Protect.
