

Security Guard Booth

Case Study

Application: Perimeter Security

Benefits Provided:

- ✓ Delivered fully-assembled with factory-installed integral roof for quick installation.
- ✓ Enhanced interior climate control with tinted windows, insulated walls and dedicated HVAC unit.
- ✓ Met demanding schedule with quick order fulfillment and completed under budget.

The Situation

Our client specializes in high speed unit-of-use bottle filling, blistering, compliance packaging as well as a wide range of secondary pharmaceutical packaging capabilities at their 189,000 square foot cGMP warehouse and distribution center in Missouri. Due to the large amount of incoming and outgoing traffic at their product shipping area, our client required enhanced perimeter security to monitor the large amount of raw and finished goods entering and exiting the facility.

The Solution

Our client desired a fast solution to meet their demanding schedule and reached out to several building providers to discuss the installation of a security booth at their shipping area. After discussing their specific needs with PortaFab sales department, our client awarded the project to PortaFab due to the fast order fulfillment and speed of installation offered.

The Result

The new building was delivered to our client on-time and fully-assembled to allow for quick installation and immediate use. It also incorporated special features designed to maintain a comfortable internal temperature during the summer and winter seasons including insulated walls, a wall-mounted HVAC unit and tinted windows. This project was assembled and installed within the time restraints of a demanding schedule and came in under budget, much to the delight of our client.
